

CALDOGCIUM

CALdogCIUM – concentrated Calcium supplement containing Beta-Carotene (Provitamin A), Vitamin D, Vitamin C and Bovine Colostrum. Calcium is well known for the vital role it plays in maintaining strong, healthy bones.

In addition to this Calcium is also responsible for

- Activation of enzymes involved in Fat and Protein digestion
- The production of Energy
- Transmission of Nerves
- Regulating the contraction and relaxation of the muscles, including the heart
- Aids in absorption of many nutrients, especially Vitamin B12

Caldogcium is developed with optimising two raw calcium ingredients, derived from calcium Carbonate and a Natural Milk Calcium supplement. These two ingredients combined, offer a calcium supplement to compliment a typical meat (Phosphorus rich) diet. Caldogcium offers the greyhound trainer the supplement to assist in ensuring correct ratio's of Calcium and Phosphorus is achieved.

Caldogcium, also contains a natural ingredient that offers excellent levels of Beta-Carotene, which is a powerful antioxidant and also provides Provitamin A that is converted to retinol (vitamin A) in the body as required. A broad spectrum of other health and vitality boosting phytonutrients are also available in their natural form. Vitamin D3, the naturally occurring form, is included in the formulation for its well known association with Calcium to form and maintain bone mass. All of these nutrients being available and working synergistically, assists in the utilisation of Calcium by the body.
