

## VITAMIN E WITH SELENIUM

A potent antioxidant. Selenium is also an antioxidant that assists with maintenance of general health and well being. It is well known that antioxidants, work better synergistically, this is why we have included a good level of other antioxidants in their natural state into our Vitamin E blend also. By the use of innovative drying technology, operating under low oxidising conditions, we have captured and retained antioxidants, in their natural state.

These have been derived from ingredients such as Carrots, Celery, Broccoli, Spinach, Cabbage and Capsicum. This cocktail of antioxidants has been specially blended with our "Natural" form of vitamin E and Selenium to ensure a superior antioxidant supplement. Antioxidants are required to combat free-radicals, that are generated in every day living especially during intense exercising and racing. Antioxidants are substances which deactivate free radicals, rendering them harmless.

### **Vitamin E may assist with:**

- Muscle maintenance
- Strength/Stamina
- Reproduction
- Well being

**Available in 450g, 1kg & 3kg**
