FLINT'S MEDICATED OILTM

*TO ASSIST WITH THE HEALING OF CUTS, WOUNDS AND GALLS ON HORSES, CATTLE
AND SHEEP*

PRESENTATION: Pale yellow oil with characteristic odour.

ACTIVE INGREDIENTS: Each L contains:
CRESOL BP 30 g

PROPERTIES:

Cresol BP is widely used as a disinfectant and bactericide for wounds, cuts and abrasions. It is absorbed and metabolised in the same way as phenol. Cresol kills disease causing gram-positive and gram-negative pathogens, and has a depressing effect on spores. When applied as directed, **FLINT'S MEDICATED OIL**TM prevents the formation of excess granulation tissue or "proud flesh", especially on the lower limbs of horses. **FLINT'S MEDICATED OIL** repels flies from the wound site, enabling the wound to heal naturally without any further irritation, as well as helping to ensure a minimal risk of surface infection whilst providing a protective film to the healing wound.

FLINT'S MEDICATED OIL is safe, gentle and soothing to use, has a long lasting effect, and is ideal for use on large cuts and lacerations, and to aid in the healing of all types of skin wounds.

DIRECTIONS FOR USE:

For topical application only: Carefully wash or clean discharge from around wound and allow to dry. Ensure wound is dry before applying **FLINT'S MEDICATED OIL** to avoid it being repelled by excess moisture. For cuts, abrasions, wounds and galls, apply **FLINT'S MEDICATED OIL** with spray or cotton wad three times a day. Continue application at least twice daily once the wound is clean and healing without surface infection, swelling or irritation.

WITHHOLDING PERIODS: (MEAT & MILK): NIL.

TRADE ADVICE: EXPORT SLAUGHTER INTERVAL (ESI): ESI not required.

POISONS SCHEDULE: NOT APPLICABLE.

REGULATORY STATUS: AUSTRALIAN PESTICIDES & VETERINARY MEDICINES AUTHORITY.
