## **K.A. CLEANS & FLUSHES<sup>®</sup>**

*EFFECTIVE DIURETIC AND KIDNEY ANTISEPTIC FOR HORSES AND GREYHOUNDS.*

**PRESENTATION:** A dustless\*, free-flowing light-brown palatable powder for addition to the feed.

**ACTIVE CONSTITUENTS:** Each 15 g dose contains:

POTASSIUM NITRATE	2.94 g	MAGNESIUM SULPHATE	2.94 g
COLOPHONY (RESIN POWDER)	2.94 g	HEXAMINE	0.27 g

### **PROPERTIES:**

**HARDOCK'S<sup>®</sup> K.A. CLEANS & FLUSHES<sup>™</sup>** is a time-honoured mild diuretic and urinary antiseptic that assists the blood clearing action of kidneys by increasing the volume and flow of urine, and acts to "flush" the body of harmful compounds accumulated during exercise. As an antiseptic, it acts by effectively cleansing of the urinary tract to reduce the risk of low grade bladder infection 'cystitis'. Thus, K.A. CLEANS & FLUSHES assists in promoting the action of the kidney, helping to increase urinary flow to eliminate problems such as 'oedema' of the lower limbs, which often occurs in horses on high grain diets after hard work or racing. K.A. CLEANS & FLUSHES is a handy product to have in the kennels at all times to regularly flush the system of racing greyhounds, especially bitches prone to 'cystitis' or bladder infection, or greyhounds on high dry food diets that result in increased risk of urinary crystals.

Simple indications of when K.A. CLEANS & FLUSHES may be used include smelly urine, thick urine or orange/darkish urine, or cloudy, 'gritty' urine in racing greyhounds suffering from 'crystals' in the urine.

It is not necessary to use K.A. CLEANS & FLUSHES everyday, as it is most beneficial when used after fast work or racing.

**DOSAGE AND ADMINISTRATION:** A level scoop (enclosed) holds 30 g K.A. CLEANS & FLUSHES

**HORSES** Mix 15 g (one half scoop) with feed morning and night. After hard work or racing mix 30 g in the first feed to flush the kidneys of waste metabolites and lactic acid.

**GREYHOUNDS** Mix 5 g (one teaspoon) in the feed morning and night. After hard work or racing, mix 10 g with first meal to help flush the kidneys and neutralise excess lactic acid.

**CAUTION:** K.A. CLEANS & FLUSHES should not be administered in conjunction with sulphonamides. Adequate clean drinking water should be available at all times.

**MEAT WITHHOLDING PERIOD:** NIL.

**POISONS SCHEDULE:** NOT APPLICABLE.

**REGULATORY STATUS:** AUSTRALIAN PESTICIDES & VETERINARY MEDICINES AUTHORITY.

### **PACK SIZES:**

	<b><u>Horse</u></b>	<b><u>Greyhound</u></b>
500 g	(contains 33 x 15 g doses)	(contains 100 x 5 g doses)
3 kg	(contains 200 x 15 g doses)	(contains 600 x 5 g doses)
10 kg	(contains 666 x 15 g doses)	(contains 2,000 x 5 g doses).
