**PROPERTIES:** SOUTER'S<sup>™</sup> LIVAMOL<sup>®</sup> is a palatable blend of proteins, energy and polyunsaturated oil formulated to improve coat condition and general appearance of all stock, including stud and show animals. LIVAMOL is especially appropriate for young, aged and convalescing animals recovering from disease or injury.

Using a unique technique for transforming liquid molasses into a convenient powder form, LIVAMOL was created by the fusion of the "dried molasses", with protein and oilseed meals, cod liver oil and essential vitamins and minerals, including calcium and phosphorus. The result is a concentrated and nutritious conditioning feed additive which appeals and is palatable to all animals and birds. Selected omega-3 fatty acids and high oil protein meals have a positive effect on coat and skin appearance. Coat colour may also be enhanced and enriched by supplementation with minerals such as zinc, copper and iron.

**DOSAGE AND ADMINISTRATION:** LIVAMOL may be mixed with, offered by free access alongside other feed or may be used in formulated rations, preferably under the direction of a nutritionist or veterinarian. A standard coffee mug (300 mL) holds 200 g LIVAMOL.
