

RAPIDVITE

RAPIDFERRO IRON

Supplement with Vitamin "C"

Rapidferro is an aid in the treatment and prevention of Iron deficiency anaemia.

It is a concentrated liquid iron supplement, containing a very easily absorbed form of iron plus two trace elements.

Rapidferro should be given for blood building in the early years. Older horses should be treated for cases of anaemia. Iron is an essential part of haemoglobin which absorbs oxygen in the blood, myoglobin in the muscles and enzymes involved in respiration.

Added vitamin C helps with the absorption of iron.

Horses with limited access to green feed and on high grain feed require supplementation.

Iron deficient anaemia results in lack of stamina, laboured respiration and poor performance.

To avoid anaemia in foals, maintain the mares iron reserves throughout pregnancy.

CONSTITUENTS: Each Litre of Rapidvite Rapidferro contains:

Iron as Ferric Ammonium Citrate	9.3mg	Cobalt as Cobalt Carbonate	0.5g
Copper as Copper Sulphate	1g	Ascorbic Acid (Vitamin C)	4g

DIRECTIONS FOR USE, DAILY DOSAGE AND ADMINISTRATION:

Rapidferro in its liquid form, can be given directly in clean water, or can be mixed into feed.

HORSES AT STUD		RACE HORSES	
Mares in Foal	25mL	Gallopers	30mL
Lactating Mares (First 3 months)	30mL	Trotters	30mL
Lactating Mares (Weaning)	25mL	Quarter Horses	25mL
Stallions at Stud	25mL	Spelling Horses	20mL
Weanlings and Yearlings	25mL		

HIGH PERFORMANCE HORSES		SHOW HORSES	
Show Jumping Horses	25mL	Show Horses	20mL
Polo Horses	25mL	Show Ponies	20mL
Eventers and Jumpers	25mL	Arabian Horses	20mL

Available sizes 1L, 5L and 20L
