

Vite Amino GB

Vitamin, Mineral, Amino Acid supplement for greyhounds (racing formula)

Graeme Bate once stated "This product is that good I would put my name to it" and he did.

Vite Amino GB is a specially formulated concentrated range of Vitamins, Minerals, Amino Acids needed by the canine athlete to balance and correct deficiencies and imbalances which occur with increased work demands.

Vite Amino GB is easily digested and palatable. It is a formulation of multi-vitamins, 7 amino acids and essential dietary minerals for the performance greyhound.

Vite Amino GB is a concentrate providing a daily source of B group vitamins required for carbohydrate metabolism and muscle function.

Essential amino-acids correct any natural deficiency common in performance greyhounds.

The minerals provided in this product are vital in preventing cellular malfunction which may cause loss of form and condition.

Vite Amino GB is beneficial for: speed, strength, stamina and general health Daily usage will maintain vitality and condition.
