

Troy Ear Canker

Drops

Actions

Antifungal, anticcoidal and antiparasitic. The synergistic effect of pyrethrins and piperonyl butoxide is particularly effective where ear mites are the underlying cause.

Indications

For the treatment of ear canker and ear mites (*Otodectes cynotis*) in dogs and cats.

Directions for use

Instill 4 - 8 drops in the ear twice daily for 1 - 2 weeks.

Presentation

Ear drops 20mL.

Composition

Dichlorophen 5mg/mL, Piperonyl butoxide 5mg/mL, Pyrethrins 500µg/mL.

First Aid

If poisoning occurs, contact a doctor or Poisons Information Centre Ph Australia 131126. If swallowed DO NOT induce vomiting. Give a glass of water. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

Storage

Store below 30°C
(room temperature).
