

# Troy Nutripet

## Actions

Provides extra energy, vitamins and minerals. Appetite stimulant.

## Indications

A highly palatable source of calorie and vitamin supplementation recommended for inclusion in the diets of dogs and cats where levels may be low. NUTRIPET can be used to overcome the animal's reluctance of the intake of tablets by fully covering the tablet with NUTRIPET.

## Directions for use

NUTRIPET is highly palatable and is usually accepted eagerly.

To acquaint the animal with the flavour, place a small amount in the mouth.

When used during convalescence and to stimulate appetite, give 10g (approx. 2 x 10cm strip) daily per 5kg bodyweight.

When used as the main source of nutrition, give 15g (approx 3 x 10cm strips) daily per 5kg bodyweight or as required.

## Presentation

Gel 200g.

## Composition

Contains Vitamins A, D, E, B1, B2, B6, B12, Nicotinamide, Calcium Pantothenate, Folic Acid, Iron, Manganese, Magnesium and Iodine in a palatable base consisting of fats, proteins and carbohydrates, providing approximately 1500 kilojoules of metabolisable energy per 100g.

## Storage

Store below 30°C (room temperature).

## Troy Nutripet

a palatable high calorie dietary supplement for use in dogs and cats lacking adequate nutrition over a prolonged period of time
