cleansing solution
for skin and ears

Troy Otolens

Skin & Ear Cleaning Solution

Actions

Promotes healing by cleansing and removing wax and necrotic tissue from affected area. OTOCLENs inhibits bacterial growth which, together with its cleansing action facilitates healthy tissue regeneration.

Indications

For use as an adjunct in the treatment of otitis externa, wounds and abrasions when healing is impaired by the presence of necrotic tissue, debris or wax in horses, dogs and cats.

Directions for use

Wounds: Apply liberally to clean the wound. Repeat application 2 - 3 times daily as necessary.

Ears: Routine cleaning – Instill liberally into ear canal. Massage base of ear to loosen wax. Repeat as required.

Otitis Externa: Follow routine cleaning directions, repeating 1 - 3 times daily for several days or as directed by a veterinarian.

Presentation

Liquid 125mL, 500mL Spray Pack

Composition

Each 100mL contains Propylene glycol 40mL,
Malic acid 2.25g,
Benzoic acid 0.15g,
Salicylic acid 0.037g.

Precautions

Rule out the possibility of other ear problems such as the presence of grass seeds before commencing use of the product. If no improvement is noted consult your veterinary surgeon.

Storage

Store below 25°C
(air conditioning).
